 Masonry Drill Bit			
 Lock Washer	5/16" 	5/16" 	5/16" 
 Flat Washer			5/16" 

**CAUTION:** The minimum required insertion depth of a brick or masonry anchor sleeve is 1 inch. Ensure the drill hole is deeper than the depth of the sleeve once the anchor is inserted. This will prevent the wall mounted garden product from falling.

**Note:** Drill hole diameters may vary based on anchor sleeves, concrete screws and wood screw manufacturer.

**Check product recommendations before drilling holes**
